

POAL Masterplan

Car Handling Building

Ports of Auckland handles nearly 800,000 cars and one million tonnes of heavy vehicles and project cargo a year.

Most of this comes through Bledisloe Terminal, Captain Cook Quay and the wharves.

There's been strong growth in the vehicle trade, with volume up 10% in 2010. About half of those cars that come through Bledisloe are from Europe, nearly 50% of the total. The rest being transported to and from other parts of New Zealand and to Pacific Islands.

Ports of Auckland (POA) has a long-term plan to make the most of our location and to be able to meet the needs of our customers. The plan is to build a new car handling building at Bledisloe Terminal. The new building will appear more in keeping with the Bledisloe Terminal's historic architecture and design. The building is expected to be completed in 2015.

On May 1, 2011, Auckland Council announced its plans to build a new car handling building at Bledisloe Terminal.

What is proposed?

A new building, which will be used for commercial and residential purposes, on the proposed site of the old car handling building. The new building will be used for commercial and residential purposes. The new building will be used for commercial and residential purposes. The new building will be used for commercial and residential purposes.

When will it be built?

We expect to start construction in February 2013. It is expected to be completed in 2015. The building will be used for commercial and residential purposes.

What other options have been explored?

We have explored other options, but we have decided to build a new building at Bledisloe Terminal. The new building will be used for commercial and residential purposes.

What will it look like?

The building will be a modern, multi-story building. It will be used for commercial and residential purposes. The building will be used for commercial and residential purposes.
